Jamal Issa

Senior Technical Business Analyst | IAM & MS Entra Suite | Avaloq Core | Agile Practitioner
Edinburgh, Scotland, United Kingdom

Summary

Business Analyst with strong business acumen and effective stakeholder engagement, ensuring project deliverables match client specification.

I have more than ten years of background in all facets of business process analysis, information systems analysis, requirements gathering, and specification design. Analytical and skilled in successfully navigating the project environment with a focus on quality business deliverables.

Collaborative communicator with all members of the organization to improve procedures, enhance productivity, and develop plans, while satisfying the needs of the operations and its customers.

Boasting a consistent and proven track record of excellence in problem-solving and resolution, through employing best business practices that improve efficiency and reduce operating costs while increasing performance. Technically proficient with Microsoft Office packages, operating systems, MacOS, Visio, Creatly, and UXPin including SAP PowerDesigner and ESP, HTML 5, CSS 3 and JS.

Master's Degree in Business Information Technology and Bachelor's Degree in Management of Information Systems coupled with the award of academic achievement ranking 2nd in the group at university. Multilingual proficiency in English, Arabic, Russian and French.

Experience

Condatis

2 years 7 months

Senior Technical Business Analyst

March 2025 - Present (9 months)

Edinburgh, Scotland, United Kingdom

Lead the analysis of complex identity and access management (IAM) solutions, aligning business needs with technical system capabilities.

Collaborate with stakeholders to define system architectures, workflows, and integration requirements, ensuring scalable and secure solutions.

Conduct in-depth gap analyses to identify inefficiencies, risks, and optimisation opportunities in business and system processes.

Document detailed functional and non-functional requirements, including API specifications, data models, process flows, and security considerations.

Work closely with architects, engineers, and developers to translate business requirements into technical solutions, ensuring feasibility and alignment with best practices.

Drive backlog refinement, prioritisation, and Agile delivery, supporting sprint planning, demos, and retrospectives.

Ensure compliance with security and regulatory standards (ISO 27001, GDPR) through robust system design and documentation.

Provide project oversight, supporting risk assessment, KPI tracking, and solution validation through acceptance testing.

Business Analyst

May 2023 - March 2025 (1 year 11 months)

Edinburgh, Scotland, United Kingdom

Work closely with stakeholders to analyse business models, workflows, and product features, identifying challenges and defining solutions.

Document functional and non-functional requirements using process flows, user stories, and acceptance criteria.

Elicit and refine business requirements from internal teams, customers, and partners.

Contribute to project proposals and business cases, evaluating product features and solutions.

Support implementation through backlog prioritisation, acceptance testing, and Agile ceremonies.

Ensure compliance with regulatory (GDPR) and security (ISO 27001) standards.

Assist project management with reporting, KPI evaluation, and project control.

Avaloq

4 years 5 months

Senior Business Analyst

July 2022 - April 2023 (10 months)

Edinburgh, Scotland, United Kingdom

- Led defect analysis to identify root causes and drive resolution, ensuring system stability and performance within credit operations.
- Facilitated requirement gathering sessions, collaborating with stakeholders to define business needs and align them with technical solutions.
- Conducted customer workshops, translating complex requirements into actionable deliverables while fostering stakeholder engagement.
- Provided effort estimation for feature development and defect fixes, contributing to effective sprint planning and resource allocation.
- Reviewed and validated test results for assigned components, ensuring compliance with business requirements and system integrity.
- Mentored and coached junior analysts and external consultants, enhancing team capability and knowledge sharing.
- Actively contributed to solution design and documentation, ensuring clarity and alignment with architectural and regulatory standards.

Business Analyst

January 2020 - July 2022 (2 years 7 months)

Edinburgh, United Kingdom

Technical Business Analyst

December 2018 - January 2020 (1 year 2 months)

Edinburgh, United Kingdom

Joined Avaloq Innovation as part of lending and credit team.

Supporting the core functionality of our product and providing third level support to our global clientele.

Involved in requirements gathering and specifications design for innovative new credit and lending software products.

Self Employed

Freelance Contractor

November 2017 - September 2018 (11 months)

Moscow Region, Russian Federation

Providing high quality administrative and IT enabled business support to a global clientele.

Social Care Alba

IT Coordinator/Business Analyst

June 2014 - October 2017 (3 years 5 months)

Edinburgh, United Kingdom

Instrumental in creating comprehensive business and marketing plans to ensure all information technology systems are updated with consummate accuracy to security and compliant with ISO 27001 quality standards.

- Successfully managed the deployment and development of Care Management IT systems through engagement with Social Care Alba and Edinburgh Napier University.
- Managed and maintained technical and administrative support for over 50 staff members working both remotely and locally, including off duty on-call support during weekends, bank holidays, Christmas and New Year, ensuring optimal performance of the business network while improving opportunities.
- Retained and procured company's physical and digital IT assets including staff folders, client folders, maintaining all relevant records are current and up to date.
- Generated comprehensive and complex reports with various company statistics, recommending improvements to design new processes and solve process-related problems.
- Coordinated a team of five developers, including conducting supervisions, inductions, approving holidays, and recruitment.

Edinburgh Napier University

Student Analyst

January 2014 - April 2014 (4 months)

Edinburgh, United Kingdom

Played an integral role within the consultancy team working side by side with the team of ALISS (A local information system for Scotland) conducting requirement gathering interviews and documenting responses for later analysis.

- Recommended process improvements and enhancements to gather and analyze data from the Twitter feed through proactive engagement with a team of Researchers and previous case examinations.

Edinburgh Napier University

Intern Social Media Analyst

June 2013 - September 2013 (4 months)

Edinburgh, United Kingdom

This internship started as a chance to learn more about social media and what sorts of data can be analysed from social media networks such as Facebook and twitter, in addition to a detailed comparative analysis of social media APIs. The project evolved into designing an evaluation framework of the social media projects done by IIDI with a concentration on twitter related projects.

Souccar for Electronic Industries (SEI)

Junior Business Process Analyst

October 2010 - August 2012 (1 year 11 months)

Syria

Provided support and summarised results following robust research, including gaps and flaws in the workflow to ensure business and technology alignment and delivery of client-specific initiatives.

- Recommended business transformation solutions, and responded to all requests from the project team, stakeholders, and senior leadership.
- Developed an (As – Is) workflow analysis using MS Visio or SAP power designer for the company to identify possible opportunities, technical activities, and projects.
- Minimized change resistance effect by executing approved solutions for improved efficiency and depth of information from stakeholders.
- Member of the Business Process Team on achieving the objectives of the Business Process Reengineering project at the company.
- Conducted and arranged requirement gathering workshops with stakeholders and business owners, to capture software design and functionality requirements for collaboration with developers.

Syrian trust for devolepment

Supervisor at Shabab Project

June 2010 - September 2010 (4 months)

Damascus, Damascus Governorate, Syria

Lead a group of 15 high school students on a tour to get to know how businesses in Syria operate including a visit to DHL, PopCorn factory, and eSyria magazine.

The Syrian Consulting Bureau for Development and Investment (SCB)

Intern Researcher

June 2009 - September 2009 (4 months)

Damascus, Damascus Governorate, Syria

Supervised the survey data collection related to one of SCB's research projects at that time and helped in processing the data and online data collection to other projects as well.
